

Statement of Work

Revision 4
5 December 2009

USMC ON-SITE FIELD SUPPORT

A. Provide an on-site field support representative at Camp Lejeune, NC, and Camp Pendleton, CA to provide the following support:

1. Serve as the MEF point of contact for MARCORSYSCOM Program Office on all matters pertaining to Fire Support Command and Control (FSC2) Systems. Provide user feedback to the MARCORSYSCOM Project Office on fielded FSC2 software and future requirements.
2. Provide technical and operational expertise in all Marine Corps Fire Support Command and Control (FSC2) systems including, AFATDS, SISTIM, Effect Management Tool (EMT), Centaur/LWTFDS, Digital Fire Control System (DFCS), and Strike Link/TLDHS, in compliance with guidance and priorities established by the MARCORSYSCOM Project Office.
3. Support the MEF Command Element and all subordinate commands and supporting agencies in the integration of all Marine Corps FSC2 systems with C4I systems, sensors and weapons systems.
4. Advise users on operational employment of FSC2 systems and assist with the development of Tactics, Training and Procedures (TTP).
5. Provide instruction to Artillery Training School (ATS) trainers and assist the ATS with development of POI, lesson plans and training/classroom instruction for MEF Command Element, subordinate and supporting units and other personnel designated by MARCORSYSCOM Project Office.
6. Provide unit exercise support as requested by using units and approved by MARCORSYSCOM Project Office.
7. Travel to perform field support tasks approved by the MARCORSYSCOM Project Office.
8. Provide support to deployed Marine forces when approved by MARCORSYSCOM Project Office.
9. Assist supported units with troubleshooting FSC2 hardware and software faults, FSC2 database integrity, FSC2 communications setup, and FSC2 shelter cabling and power.
10. Assist the MARCORSYSCOM Project Office in fielding new software and hardware as part of the FSC2 Fielding Team.
11. Assist in providing support to MARFORRES elements as directed by MARCORSYSCOM Project Office.
12. Manage the supported unit JMUL to incorporate updates from the MEF Command Element and subordinate commands for changes, additions, and deletions in the AFATDS Joint Master Unit List (JMUL). JMUL inputs will be submitted to the USMC FIT Lead.

Statement of Work

13. Participate in FSR training sessions approved by MARCORSYSCOM to maintain proficiency in all supported FSC2 systems.

B. Provide a U.S. Marine Corps (USMC) Field Integration Team (FIT) Lead to perform the following tasks:

1. Provide operational oversight and coordinate the support activities of all Marine FSC2 FSRs.
2. Provide technical and operational expertise in all Marine Corps Fire Support Command and Control (FSC2) systems including, AFATDS, SISTIM, Effect Management Tool (EMT), Centaur/LWTFDS, Digital Fire Control System (DFCS), and Strike Link/TLDHS, in compliance with guidance and priorities established by the MARCORSYSCOM Project Office.
3. Compile and submit weekly status reports and trip reports to MARCORSYSCOM. Reports will be in contractor format.
4. Travel when approved by the MARCORSYSCOM Project Office to augment FSC2 FSR support of unit training, exercise support and deployments.
5. Produce Briefings and presentation materials, as required, to communicate AFATDS and Fire Support information. Briefings and Presentations will be in contractor format.
6. Consolidate quarterly JMUL updates from FSC2 and Marine agencies. And submit to MARCORSYSCOM for review and assignment of Unit Reference Numbers.
7. Participate in FSR training sessions approved by MARCORSYSCOM Project Office to maintain proficiency in all supported FSC2 systems when approved by MARCORSYSCOM Project Office

C. Special Instructions:

1. The USMC AFATDS and TLDHS Project Offices are authorized to provide technical direction, clarification, and prioritization of efforts performed under this SOW. Any issues relating to contractual compliance must be raised to the COR or PCO.
2. Subject Matter Experts (SMEs) for Strike Link/TLDHS will provide reach back technical and operational expertise to FSRs and augment FSRs for training and exercise support when
3. Task Duration: from contract implementation through the end of the TLDHS contract period. (currently Dec 2012)

F. MARCORSYSCOM Project Office POCs are:

Capt Jacob Johnson
AFATDS Project Officer

MGySgt Piper
AFATDS Operations Chief
